

Secured Flight Data

Since 2011 travel agencies are committed to update all booking files with flights to the US and within the US with the secured flight data. Also affected by the program include countries Canada, Mexico, Cuba and Jamaica.

In order to guarantee a fast service, we kindly ask you to insert the necessary information into the reservation for ALL booked airlines and passengers before submitting the PNR to our queues. As long as this information is missing, we are not able to issue your booking.

Please find below examples for each GDS
